YASH ANAND

Developer & Designer / *yashanand.work* / *devlar.in*

Skilled in design and development of UI/UX interactions for web & mobile. I have developed enterprise-grade progressive web apps based on Angular and possess intermediate knowledge in React, Rails, NodeJS (MEAN Stack) — paving my path towards Full-Stack. I also have experience in design and development of cross-platform (Cordova) & native mobile applications. Along with some ambitious batch-mates, I assembled a team called Devlar (devlar.in).

EXPERIENCE

Software Development Intern
Feb 2017 - Present
AppSecure India
 Bangalore, India

- Startup based in Bengaluru focused on providing web/mobile/network security.
- I interned here as a telecommuter building complete web interfaces for their apps like *Phish.Watch, Rakshak.io, Vulneye* etc.
- The most recent project (Rakshak.io) is going to be presented at RISE Conference, 2018.
- I worked mainly designing UX/UI and developing the frontend from scratch using Angular (JS to 2/4/5/6).
- The startup was recently listed under Forbes 30 under 30, Asia.

Developer & Designer
Oct 2015 - Jan 2015
Computer Society of India
 VIT Vellore Chapter

- A multi-disciplinary University Chapter with the sole aim of honing technology and pushing it forward.
- I have helped developed internal applications for events, internal projects etc.
- Most of all, I was the key designer for the branding of events, apps etc.
- Hosted as a coordinator for one of their biggest events - Yuvana.

Graphic Designer
Technology & Gaming Club
 VIT Vellore Chapter

- Technology And Gaming Club Aka TAG Was Founded by a few enthusiastic students of BTech CSE In VIT University, Vellore.
- Since then they have been expanding and conducting successful events one after the other in the sphere of game development and gaming. I worked as a designer here.

Graphic Design Intern
BeepWeep Media
 VIT, Vellore

- BeepWeep is an entertainment and news publishing website for audience along with advertising company for product sellers and MNCs.
- It got Featured by AIESEC in Delhi IIT and VIT Vellore.

• OOP	• JavaScript	• MongoDB	• Xcode
• Software Development	• TypeScript	• RxJS	• Zeplin
• Algorithms	• HTML	• CMS	• Webpack

Notable Skills

Angular
C & C++
Java
React
JavaScript

PROJECTS

Rakshak Beta
Angular 6, Angular CLI, Webpack
https://rakshak.io

This project is going to be presented at the RISE Conference, Hong Kong, 2018. Rakshak provides advanced automated monitoring for web applications. The app's UI / UX was designed and developed solely by me as an intern at AppSecure using Angular 6 and arguable the best practices available then.

PhishWatch
Angular 2, Webpack
https://phish.watch

PhishWatch is a powerful phishing framework that makes it easy to test an organization's exposure to phishing. The app's UI / UX was designed and developed solely by me as an intern at AppSecure.

Vulneye (New)
Angular 5, Angular CLI

An enterprise application for companies that will serve as their private hub for managing their bug bounty programs/vulnerability reporting/report generation with full view & control over the process through a convenient dashboard. The app's UI / UX was designed and developed solely by me as an intern at AppSecure.

The Liberation League Website
ReactJS, Gatsby, Netlify CMS
https://theliberationleague.org

An NGO based in Pune. A blog to host information about all happenings, tutorials etc. The site was built using ReactJS, supported by a Gatsby starter and linked to the Netlify CMS for a backend-less content management.

Drill (Prototype)
MEAN Stack

A community where users share a timeline of events which helped them learn a topic of their choice. The prototype was built in an hackathon by my team, which is now Devlar (devlar.in).

Pentest Cloud
MEAN Stack, Bootstrap

A website hosting a pool of useful, effective and some unique penetration tools. The early frontend code was written using pure HTML, CSS & Bootstrap but was later ported into an AngularJS application. The app's entire UI / UX was design by me before developing the frontend. (https://pentest-cloud.com)

Vulneye (Old)
Angular 2, Webpack

Vulneye works for you and your projects by continuously finding vulnerabilities and issues in your dependencies. Find security issues in your depencencies using Vulneye and it'll help you fix them. The app's entire UI / UX was first designed and then developed by me.

Creative Space
MEAN without Angular

Creative space is a platform for any form of creative artist or people in general to put together their portfolio and build up an audience at the same time. Every person needs and has their own creative space, the joy of creating and finishing something you started is an immense one, and it must be shared with the world.

I have worked on many more projects that can be found on my **Website (yashanand.work).**
